

AKASH ALOYSIUS JAMES

Full Stack Software Engineer

+39 389 210 4554 | Milan, Italy | akashaloysius.james@gmail.com | linkedin.com/in/akashaloysiusjames

Senior Full Stack Software Engineer with 4+ years of experience designing and delivering cloud-native applications using **Go, TypeScript, Vue.js, PostgreSQL, Redis, AWS, and Kubernetes**. Experienced building products serving **50,000+ users**, owning architecture from frontend to backend, optimizing system performance, and translating business requirements into scalable technical solutions. Strong background in REST APIs, distributed background processing, caching, authentication, observability, and modern frontend engineering.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Lifeed, October 2023 – Present

- Owned full-stack application end-to-end using **Go, Vue, TypeScript, PostgreSQL and AWS** serving **50,000+ users**.
- Independently architected and built an internal admin platform with background workers, authentication, authorization and operational tooling to improve flexibility and automate previously manual operations.
- Orchestrated cloud infrastructure with **AWS EKS, ALB, RDS**, Docker and Kubernetes for the admin platform.
- Cut dashboard API response time from **5s to 3s** by redesigning the Redis caching architecture and eliminating N+1 database queries using GORM preload.
- Built PWA using **Vue, Quasar, GraphQL, Strapi CMS, and Firebase**, with reusable content and push notifications.
- Collaborated with Product team for feature delivery and led Ditto integration to improve localization workflows.
- Introduced **Prometheus** and **Grafana** monitoring, contributing to **99% uptime**, and increased automated test coverage to **90%** using Go, Jest, Vitest, and GitLab CI/CD.
- Migrated Intercom workflows, implementing event tracking and email notifications to improve retention and completion rates by **12%**.
- Reviewed PRs, established coding standards, and contributed to architecture and roadmap decisions.

Junior Full Stack Developer

MHS Global Impact, February 2021 – June 2022

- Developed Angular applications and .NET Core REST APIs for document management and approval workflows.
- Optimized MySQL queries and backend performance while improving UI and cross-browser compatibility.
- Delivered Android applications using Cordova and supported AWS deployments through Jenkins CI/CD.

EDUCATION

Masters in Computer Science and Engineering

Politecnico Di Milano, Milan (2019 – 2023)

Bachelors in Computer Science and Technology

SRM University, Chennai (2014 – 2018)

SKILLS

Frontend:	Vue, React, Angular, HTML5, CSS3
Backend:	Go, Node.js, Laravel, .NET Core
Tools:	Git, Jira, Figma, Jest, Vitest, Google Lighthouse
Database:	MySQL, PostgreSQL, Redis, Firebase
Cloud/DevOps:	AWS, Docker, Kubernetes, EKS, EC2, PostgreSQL RDS
Languages:	English (C1 IELTS), Italian (A2 CILS)

PROJECTS

Portfolio

(<https://github.com/AkashJam/portfolio> | akjames.dev)

- Built and hosted a Next.js/TypeScript app (Tailwind, MDX), owning it end-to-end from UI to infrastructure.
- Provisioned AWS with Terraform (EC2, Route 53, IAM) and automated CI/CD via GitHub Actions with AWS OIDC.
